PROFESSIONAL SUMMARY

Software Engineer with **3+ years** of experience architecting and delivering enterprise-scale web solutions for global clients including **Verizon**. Currently leading frontend architecture and ML-powered workflow integration for Verizon enterprise platforms at Tech Mahindra. Deep expertise in React.js, TypeScript, WCAG 2.1 accessibility, and AI-assisted engineering with GitHub Copilot. Proven track record of owning solutions end-to-end — from client solutioning and technical architecture through production delivery — in fast-paced Agile environments. Seeking to bring hands-on Verizon platform knowledge to a **Customer Support Tool** or direct **Product Solution Engineer** role.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, REST API Design
State Management	Redux Toolkit, React Query, Context API
Databases	MongoDB, MySQL, PostgreSQL, Firebase
Testing & QA	Jest, React Testing Library, GitHub Copilot (AI-assisted testing & development)
Tools	Visual Studio, Claude Code, GitHub Copilot
Cloud	Google Cloud Platform
Specializations	ML Model Integration, WCAG 2.1 Accessibility, Solution Architecture, Data Visualization, Agile/Scrum

PROFESSIONAL EXPERIENCE

Sr. Product Solution Engineer

Nov 2025 – Present

Tech Mahindra · Pune, Maharashtra · Client: **Verizon**

- Leading frontend architecture and end-to-end solutioning for **Verizon enterprise customer platforms**, driving technical design from requirements through production delivery
- Building React.js + TypeScript interfaces for ML-powered workflows, real-time analytics dashboards, and customer data visualization tools at enterprise scale
- Designed integration layer connecting ML model outputs to production-grade UI components, enabling actionable insights directly within customer-facing workflows
- Driving client solutioning sessions with Verizon stakeholders — translating complex business requirements into scalable technical architecture proposals
- Collaborating with cross-functional backend teams on API contract design, system integration, and delivery governance

Software Developer

Mar 2025 – Oct 2025

Async Zone · Remote · Multi-client

- Contributed to full-stack development of **FocusApp**, an export management platform for home furnishing manufacturers, using React, Tailwind, Node.js, and MongoDB
- Owned end-to-end QA processes across multiple client products — managing test planning, defect tracking, and release quality assurance
- Implemented WCAG 2.1 accessibility standards across product UIs, achieving **100% Lighthouse accessibility scores**
- Leveraged **GitHub Copilot** for AI-assisted development and automated test generation, accelerating delivery velocity across client engagements

- Contributed to UI/UX design, API design reviews, and CI/CD workflow optimizations across multiple client products

Technical Assistant

Jul 2024 – Mar 2025

Teleperformance — Adobe Systems · Gurugram, Haryana

- Built and maintained a reusable React + Tailwind component design system for the Adobe Systems client engagement
- Delivered enterprise-ready frontend solutions in Agile sprints, contributing to faster and consistent feature iteration cycles
- Conducted WCAG 2.1 accessibility audits and led UI remediation efforts across product components

Project Engineer

Oct 2023 – Jun 2024

ERNET, MeitY — Government of India · Delhi

- Architected and developed multi-institution portals serving **100+ institutes** using React and Node.js, deployed across distributed institutional networks
- Built real-time dashboards and RESTful APIs, reducing manual administrative effort by **40%** and eliminating reporting bottlenecks
- Delivered scalable frontend architecture supporting concurrent users across the national academic network

PROJECTS

Cloud Admin Dashboard

React.js · Chart.js · Node.js · ARIA

Real-time admin dashboard with live data visualization, interactive charts, and fully ARIA-compliant accessible components. Optimized for performance and Lighthouse scores.

FocusApp

React.js · Node.js · MongoDB · Tailwind

Export management platform for home furnishing manufacturers. Features export workflow management, product cataloging, and ARIA-compliant accessible UI components.

Personal Portfolio

React · Tailwind CSS · Framer Motion · EmailJS

Responsive developer portfolio with smooth animations, contact form integration via EmailJS, and modern design built with Tailwind CSS and Framer Motion.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2019 – 2023

Dr. A.P.J. Abdul Kalam Technical University

Relevant Coursework: Data Structures & Algorithms · Object-Oriented Programming · Operating Systems · DBMS
